## ELEMENTS OF THE SKIES

From the serene grace of leisurely balloon rides to the high-speed efficiency of passenger jets and the formidable power of war planes, mankind's conquest of the skies stands as one of its greatest and most awe-inspiring achievements. The ability to soar above the clouds not only reshaped our world but also expanded the boundaries of human exploration, adventure, and defense.

Whether flight symbolizes the romantic allure of distant journeys and unexplored horizons or the critical role of defending a nation's freedom, the significance of aviation is undeniable. Authentic Models celebrates this triumph through an exquisite collection of handcrafted decoration pieces, each one a tribute to the many forms flight has taken over time.

PLANE MODELS

Legendary and full of nostalgia, our airplane models capture the spirit of aviation's most iconic machines. With aluminum, riveted propellers that evoke the classic roar of these aircraft, they bring back memories of a time when flight was both thrilling and dependable—noisy, yet safe and familiar. From the groundbreaking Ford Trimotor, a pioneer in commercial aviation, to the powerful and agile Spitfire, which dominated the skies during World War II, our collection is a tribute to aviation history. Each model is crafted with unbelievable attention to detail, meticulously recreating the unique features of these famous planes.

To complete the experience, every airplane comes with an aluminum stand, designed to showcase your model in style. Each stand includes a plaque, adding a touch of authenticity, and allowing you to proudly display your favorite aircraft in your home, office, or collection. Whether you're an aviation enthusiast or a collector, these models are the perfect way to celebrate the legends of the sky. So, are you ready for take-off? Explore the craftsmanship and history behind each model and let your collection soar.

Between 1926 and 1933 only 199 Trimotors were built in Ford's own factory. Corrugated metal on great thick monoplane wings was a German development, used in Junker JU-52 planes that were flying the Berlin-Rome-London route. Trimotors were flown by airlines, oil companies and wealthy individuals. The Ford Trimotor and Junkers JU-52 were pioneering airplanes that led to generations of Douglas and Boeing fleets of aircraft, soon to criss-cross the world.

DAKOTA DC-3

AP455

The DC3 has earned the epithet "Workhorse of the Skies". Thousands were produced from the end of WWII into the 1950s by the Douglas Aircraft works. Military, civilian, government, private, you name it. Utterly reliable. Even now it's possible to find them flying from remote airports, landing on the tightest strips. Legendary and nostalgic. Aluminum, riveted propellers, noisy, but also safe and familiar.

SPITFIRE

AP456  
76 x 62 x 46 cm  
29.9 x 24.4 x 18.1"

The legendary Spitfire fighter was introduced in 1936 as a short-range, high-performance and single-seat aircraft. Beloved by pilots it still has an iconic status. Our model has unbelievable details like retractable main wheels, sliding cockpit window and functioning tail rudder. Shipped with an aluminum stand with plaque.

Sleek and powerful, Connie set a number of speed and distance records, despite experiencing frequent motor problems which led to them being jokingly called the most reliable three engine aircraft. The plane's elegant appearance was the result of no two bulkheads being the same shape. A design which has long since been superseded by cheaper, more pressure-change-resistant tube constructions.

OARS

For thousands of years, vessels were powered by sails or the strength of rowers and paddlers, with some ships using both oars and sails depending on wind conditions. This combination allowed for flexible navigation and played a key role in exploration and travel.

In rowing clubs worldwide, "trophy" oars are displayed as symbols of skill and endurance. Inspired by this tradition, our decorative oars are crafted from high-quality wood, just like the classics. They blend craftsmanship with elegance, making them timeless pieces that celebrate the legacy of nautical achievement and adventure.

## DETERMINE YOUR COURSE

Before the technological revolution transformed the way we navigate and understand the world, intrepid explorers relied on finely calibrated analogue instruments to guide them through uncharted territories. These tools were essential for measuring time, assessing weather conditions, reading maps, surveying their surroundings, and determining direction. In an era when precision was crucial, these instruments represented the height of craftsmanship and ingenuity, enabling explorers to push beyond the known world and venture into the unknown.

Authentic Models captures this spirit of adventure and discovery with its collection of fully functioning compasses, vision-enhancing aids, timepieces, and weather measuring devices. Each piece is a tribute to the vital role these inventions played in history, honoring their legacy with skillful craftsmanship and attention to detail. Beyond their practical functionality, these instruments charm with their aesthetic appeal, offering a touch of old-world elegance. Whether you are drawn to the art of navigation, fascinated by the science of timekeeping, or simply appreciate the beauty of finely crafted objects, these pieces invite you to rediscover the art of exploration and put your own skills to the test. Authentic Models brings the timeless spirit of adventure into the present, making these classic instruments a perfect blend of beauty and utility.
